

# Egg Drop Experiment

## Before The Experiment Questions:

Use these questions to help your child think about the experiment and to keep track of their predictions.

**Which material do you think will protect the egg best?**

---

---

---

**What changes when different materials are used to protect the egg? Will one material work better than others?**

---

---

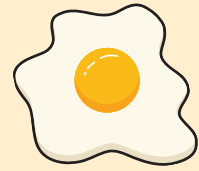

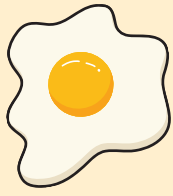

---

**Which egg do you think is definitely going to break?**

---

---

---

# Egg Drop Experiment

## Post Experiment Questions:

Use these questions to help your child think about what happened during the experiment and their thoughts on what they could've changed.

**Think about your design. What worked well?**

---

---

---

---

---

**What didn't work? What would you change?**

---

---

---

---
